

# Carbon Opportunities - Innovations in energy

More details available on our website <http://www.greencapital.org.au>

Following on from our Going Carbon Neutral event held in May, our next event - 'Carbon Opportunities' examines energy efficiency. The event will highlight the potential for innovation not only within organisations but also in product streams and stakeholder relationships.

Increasingly, organisations are taking the first steps to carbon neutrality, how can organisations most effectively manage their carbon footprints using energy efficiency? How will the changes in the energy industry and government policies help?

- Learnings from selected Energy Efficiency Opportunities (EEO) pilots and how they can be applied to all organisations.
- How to embrace product and service innovation in a carbon constrained world while creating new revenue streams.
- The current policy landscape on energy efficiency.

This event will provide an overview of what organisations can and are doing to gain a competitive edge - it is must for any organisation serious about energy efficiency or wanting to build their capacity to embark on the carbon neutral path.
